INDEX.

☞ We have arranged under the respective heads of HOUSEHOLD ECONOMY—FARM IMPLEMENTS—DISEASES OF ANIMALS—DISEASES OF CROPS—FARMERS' GARDEN—MEADOWS and PASTURES—MANURES and INDIAN CORN, &c.—whatever relates to these particularly.

Page.

Acknowledgments 13, 59, 92, 188, 189
Address to dairy women 79
Advantages of science 89
Agricultural movements 5
— periodicals 7, 107
— — recommended for common schools 10
— — their advantages 13, 49
— — salutary influence of 108, 190
— chemistry, its importance 150, 35
— convention, N. Y. State, the proceedings of 27
— — at Syracuse .... do 33
— address of J. Buel, to Fulton county society 170
— bounties of Maine 45
— — of Massachusetts 33, 71, 86, 169
— employment, commended 74
— libraries, books recommended for 78, 91
— items 187
— memoranda 106
— museum in Scotland 152
— — recommended in N. York 198
— exhibitions noticed 152
— report in Massachusetts 56, 69
— — of Mr. Allen, in Assembly 31
— improvements in Scotland 150
— society, N. Y. State, their proceedings 21
— — suggestions to 77
— — of Newcastle, Del 42
— — of Scotland, notice of its annual meeting. 12
— — national of Britain 136
— — — American, proposal to establish 60, 109
— societies, their utility 102
— — notice of new ones 150
— legislation, much wanted 189
An admonition to farmers 73
Agricultural bill, reported in Assembly 32
Agriculture, its importance to society 64, 94
— encouragement given to it in France 107
— what has our legislature done for it 71
— its study recommended 152
— has been patronized by wise governments 141
— of Germany, its condition 72
Agricultural school, remarks in relation to 71
— circular in relation to 183
— plan of study in 76
— at Templemoyle, Ireland. 97
— three others in Ireland 152
— in France 98
— of Hoffwyl, noticed 107
Agricultural schools, their public utility demonstrated 165
Atmosphere, a source of fertility 45
Agricultural and Horticultural society in Michigan 185
American Institute, 11th anniversary 130, 187
Am. Soc. for diffusion of useful knowledge 151, 181, 190
— — note from the executive committee of 215
Alkalies, their effect in preserving wood 138
Available means of agricultural improvement 102
A small matter set right 5
Army worms, avert blight 192
Apples, S. Preston's remarks on 38
— how preserved in winter 189
— butter, how made 63
— pomace, good for stock 187
Axiom in husbandry 91
Aim and fruits of philosophy 56
Burn, &c. Armstrong's plan of 13
— Bement's do 14
— Lagrange's do 15
— Cowles' do 47
— Penn's do 48
— Walker's opinion of a 49
— Jewett's portable 103
— plan of a Pennsylvania 172
Beet sugar, remarks on 9
— — great improvement in making 72
— — new improvements in making 203
Bee-hive, the Vermont, described 141
— — the Kentucky do 203
— moth, how to avoid 64
Breeding farm stock, important essay upon 193, 209
Board of agriculture, useful duties it might perform 197
Book-farming, considered 19
— — defined 137
Bog land, how improved 12
Butt-hinge manufactory at West Troy 204
Books on agriculture for schools 96
Buckwheat, Indian, noticed 46
Bees and Bee-houses 62
Bad practices in farming 77, 126
Botany, Johnson's lectures on 129
Board of agriculture 197
Cash-book, important to the farmer 194
Calf, extra large one noticed 59
Caution in the use of manures 136
Calendar of Flora 201
Cattle, the best to be kept for breeding 7
— Yorkshire cow 8
— Devonshire ox 8
— directions for stall-feeding 44
— hints on feeding 122
Cattle, short-horns, sale of Weddle's 104
— — of Whitaker's stock 150, 187
— — of Clarkson's 120
— — great prices in Kentucky 187, 194
— — prices at Holkham sale 122
Canker-worms, how destroyed 40
Capital, health, industry and intellect 66
Carrots, Mr. Spring's crop 187
Cultivator premiums 5, 200
Cucumbers, culture and profit of 173
Climate, artificial means to improve 40
Crops, in Chenango 19
— prospect of the 120
— further notice of 126
— in Virginia, defective 143
— in New-Jersey, deficient 143
— in West New-York 157
Children, belong to the republic 55
— in manufactories, their condition 55
Criticism, on Mr. Glass' letters 60
Clover, its culture in the south 74
— mode of curing in cocks 109
— and clover seed, invite attention 201
— leys, how made beneficial 196
Corn-stalk fodder 94, 200, 205
Chemical knowledge, important to the farmer 104
Convertible husbandry 107
Cheese from potatoes 107
— modes of making in Scotland 169
— double Gloucester, how made 169
— Stilton and Wiltshire do 169
Cows, great product of 110, 139
Cotton culture and its profits 124
Choice scraps 148
Common school libraries, legislative provision for 101
— subject noticed 151, 157, 182
Couch grass, valuable cattle food 152
Cider, mode of making and fining 157
Clay soil, means of improving 194
Close of the volume, remarks on the 197
Dairy, its profits 15
— management in Scotland 168
Deterioration of soil 9
Dogs, cured of sheep-killing propensity 11
Doctoring fruit trees 206
Deep ploughing, recommended 80
— its importance explained 87
Draining, its advantages illustrated 87
— its practical effects 106
— by steam, noticed 106
— on Ohio prairies 110
— averts the effects of drought 137
— perfect subsoil recommended 147
— furrow, economical mode of 144
— under, inquiries relative to 110
— — economical mode of 126
— tiles of peat, how prepared 144
Decomposition of vegetables 98
Different systems of farming 112

DISEASES, &c. OF FARM CROPS.

Elder will protect grain from rats 92
Grain weevil, described, &c 121
Turnip fly, how avoided 104, 121, 150
Insect enemies, described 18
— notice of 183
Remarks on the grain worm 50, 55
Efficacy of lime in repelling do 108, 127
Feeding off wheat in spring prevents the ravages of do 64
The least of the bugs described 55
Damage from insect enemies 89
Striped bug and turnip fly, how kept from plants 91
Fumigation successful in protecting crops 136
Causes and prevention of rust or mildew 136
Wheat maggot 167
Prevention of mildew 178
Blight caused by barberry bushes 204
Mode of destroying grubs 206
Experiments with steeps 119
Smut avoided by using old seed 51
— directions for preventing 102
— how communicated to clean seed 55
Remedy against the Hessian fly 59
To prevent injury from the cut worm 63
Curculio, how to guard against 111

DISEASES, &c. OF FARM STOCK.

Cure for poll-evil 45
— foul in the foot 45
— horn-ail 48
— stifle 207
— galled backs of horses 187
— scours in calves 19
— hoof-ail 207
— ring-bone 94
— joint-murrain, or garget 94
Prevention and cure of the murrain 93
Corn-stalks, a remedy for heaves 109
To relieve choked cattle 78
Hints for preventing diseases in horses 113
— on the inflammatory complaints of horses 131
Education, in natural science, diminishes crime 91
— physical, intellectual and moral, necessary 127
— condition of, in Germany 202
Economy of health, extracts from 58, 204
Eggs, importations of, in England 120
Expenditures of government 162
Evergreens, a calcarious soil not congenial to their growth 189
Ellsworth's notice of the upper Wabash valley 211
Education, remarks on 198
Facts for the fireside 161
Farmers and mechanics, the producers of national wealth 162
Farming in North-Carolina 192

FARMERS' GARDEN.

Location and preparation 118
Plan and laying out 119
Fruits—select early apples, pears, plums, cherries, grapes, quinces, peaches 133
Currants, gooseberries, strawberries, raspberries, transplanting 134
Culinary vegetables, herbs, salads, &c 168, 183
Ornamental trees and shrubs 208
Its value—transplanting 38
Sprouts do not make good stocks 62
Onions, culture of 88
Grape, its culture 61, 142
— to make wine from 62
Wine-sour plum 58
To prevent mildew on gooseberries 104
Plan of one in Virginia 173
Black canker on plums 123
Rhubarb, how forced in winter 169
Strawberries, varieties and modes of culture, 101, 109, 140

FARM IMPLEMENTS, &c. noticed.

Corn crusher and grinder 58
W. A. Seely's machinery 17, 18
New drill-barrow 59
Machine for sowing lime 59
Steaming apparatus 63
Bush-harrow, how constructed 65
Small's plough 71
Bushnell's drill-barrow 71
Parker's manufactory of, Richmond 71
Pitt's separator and cleaner 138
Log-lifter 172
Improved wind-mill 172
Potato-lifter (Lawson's) 114
Grass-seed sowing machine 191
Boynton's straw-cutter 202
Webster's threshing machine 74
Scotch turnip drill 75
Gauge wheel for plough 76
Potato washers 127, 94
Several enumerated and priced 105
Hoyt's drill-barrow 111
Green's straw-cutter 119
Steam plough 119
Horse power and thresher 124
Centrifugal disseminator 126
Fruit trees, should be pruned in June 41
— blight on, cause conjectured 139
Force of habit 78
Freak of nature 92
Flora of North America, Torrey & Grey's 120
Flax, new process of preparing 121
Florida, south, climate and soil of, &c 111, 122
Germination of seeds 44
Grain, on sowing early and feeding in spring 49
— varieties deteriorate, and should be renewed 134, 182
— weight of, influenced by climate 152
— new mode of stacking 162
— new varieties of, noticed 182
— proper time for cutting 102
Grain-worm, premiums offered for security against 71
— two kinds of 102
Grafting, Knight's mode of 57
Grafting clay, of the French, &c 57
Geological science, applied to agriculture 70
— survey, of Ohio 72
Grease for wheels and machinery 187
Glass head dresses 187
Harrowing grain recommended 9
Harvest prospects in June 71
— — in July 101
— beverage 91
Half-farmers, described 71
Hedges, two important points in clipping 9
— objections to 16
— C. Kirk's mode of managing 34
— evergreen plants proposed for 64
— cedar, mode of planting 19
— of willow, recommended 156
Hints, to those who write for instruction 48
— in husbandry 57
— on pruning forest trees 104
— for the master 199
Horticulture, Prof. Ives' address 11
— Professor Shepard's do 199
— President Dwight's love of 11
— Van Mon's improvements in 11
Horticultural exhibition at New-York 162
— society of the valley of the Hudson 120
Humus, its nature and properties 42
Help one another 43

HOUSEHOLD ECONOMY.

Hams, how cured 161, 190
— how to keep in summer 46, 190
Soap-making, economically managed 125
Cream, how managed in summer 191
Hints in regard to ventilation, &c 169
To make salt butter fresh 204
To purify tallow 204
Cement for broken china 204
— for cast iron boilers 204
— that will resist fire and water 204
— for floors 204
Directions for making shoe-blacking 204
Milk, economical mode of managing in summer 80
Preserving plums 204
Improvement progressing in the south 74
Imports and exports of sugar and silk 90
Improvement of the mind 92
Ice-houses, modes of constructing 145, 173
Improvement in horticulture—J. Buel's address 152

INDIAN CORN.

Steeping the seed recommended 51, 78
Sprouting, its advantages 79
Varieties enumerated 43
Criticisms on the above 75
Remarks on the varieties of 81
Early varieties noticed 140
Means of augmenting the crop 43
Method of obtaining new varieties 64
Suggestions as to deep planting 208
Baden, will not ripen at the north 9
Dutton, has its counterfeits 9, 59
— its early maturity in Dutchess 89
— its character in Connecticut 94
— commended 157
— its great weight 47
Experiments in harvesting 57, 149
Cutting up recommended 119
Care required in saving seed 135
Mr. Vail's crop 15
D. Sunderland's crop 36
Mr. Spring's crop 209

Mr. Ingall's premium crop ... 188
Mr. Osborn's do ... 183
Singular growth of ... 192
Corn stalk fodder, cut, is good food for cattle ... 205
Kentucky soils deteriorating ... 39
Knitting machine noticed ... 187
Like produces like ... 54
Lombardy poplar, its use ... 136
Lunar influence, on meats ... 172, 191
Looking-glass for farmers ... 173
Making pork ... 209
Matters interesting to all ... 209
Mangold wurizel, Mr. Spring's crop ... 139
— — its mode of culture ... 121
Manufactures, their importance to agriculture ... 60
Mixed crops, successfully tried ... 8, 77, 159
Moral culture, promoted by industrial schools ... 185
Meat, preserved without salt ... 147
Meteorological data ... 9
Millers' tolls ... 74, 103, 139, 173
Madder, its culture in Pennsylvania ... 80
Main objects of the farmer ... 89

MANURES.

Ashes, barilla, their value ... 191
— common, their utility ... 112
Specific ... 201
Effects of different kinds ... 138
Relative value of different kinds ... 129
Advantages of applying when fresh ... 126
Their importance shown ... 6
Unfermented, to what crops best applied ... 39
Not generally economized ... 39
The quantity per acre ... 44
Hog-dung, how applied ... 59
What is a load? answered ... 73
Mode of managing ... 79
Of the fold yard, not duly preserved ... 122
Why are they best buried? ... 152
On the winter management of ... 202
Their value illustrated ... 144
Liquid, their value ... 86
Marls, their operation ... 57
— mode of application ... 98
Composts, in what cases useful ... 152
Peat earth, source of fertility ... 115
— — and peat ashes, mode of applying ... 118
Marsh mud do ... 115
— — analysis of ... 116
Sand and ashes good for clay soils ... 204
Bone-dust, its operation ... 105
— — remarks on ... 121, 141
Desiccated, notice of ... 122
Lime, hints in regard to its application ... 42
— essential in a wheat soil ... 72
— its benefits not appreciated ... 72
— salts of, their importance ... 72
— directions for analyzing ... 91
— interesting facts in relation to ... 91
— used in blasting rocks ... 91
— theory of its action on soils ... 97
— practical application of the theory ... 97
— magnesian, not injurious ... 147, 150
— new mode of applying ... 184
Gypsum, its reputed efficacy on fruit blossoms ... 12
— recommended to be sown broad cast for corn ... 209
— its efficacy when sown in autumn ... 47
— quantity to be sown per acre ... 58
— experiments with ... 59
— singular effects of ... 110
— its good effects in drought ... 156
— inquiries into its operation ... 192
Mulberry, remarks upon the ... 185
— mode of growing in stools ... 10
— multicaulis, on the culture of ... 142
— — directions for its culture ... 167
— — speculations in ... 149
— — seeds of, not to be depended on ... 49, 50
— Brussa, queries and answers in relation to ... 143
— — sale of, at Newburgh ... 55
— — its character ... 55, 65
Mulberry and sugar beet, Mr. Randolph's report on, in Congress ... 90
Melons, their culture in the south ... 74

MEADOWS AND PASTURES.

How improved ... 9, 59
On converting plough land into permanent meadow and pasture ... 56
How to renovate them ... 18, 127
Advantage of top-dressing them ... 50
Oat pasture, how managed ... 10
Grass land that ought not to be broken up by the plough ... 192
On the advantages and disadvantages of breaking them up ... 192

NEW HUSBANDRY.

Preliminary remarks ... 5
Manuring ... 6
Draining, good tillage ... 37
Alternation of crops ... 53
Fallow crops—conclusion ... 54
Nitre, its reputed efficacy in steeps ... 12, 55
New-Jersey lands, their natural advantages ... 49
North and south compared, in regard to agriculture ... 80
Nothing is annihilated ... 178
New discovery in philosophy ... 183
New mode of planting trees ... 187

NOTICES OF CORRESPONDENCE.

Root culture, starch and sugar, carrot seed, devastation by blackbirds, oil of tobacco, horn-ail, after-culture, millers' tolls ... 12
Spent tan-bark, ruta baga feed, steeps ... 13
Advantages of cutting up corn, spring rye, sugar-beet seed, swamp muck, hedges, spreading lime, pollevil, rotation of crops ... 45
Sheep husbandry, worn-out lands, succoring corn, beet sugar, Italian spring wheat, hams, Indian buckwheat, pumpkin seed oil ... 46
Disease in fowls, capons, shade-trees, to keep meat fresh, ruta baga, Illinois farming, renovation of meadows, old apples, large calf, maple sugar, animal carbon, Brussa mulberry, Rohan potato, Italian wheat, succoring corn, strawberries ... 92
Steeping seed wheat, curculio, horn-ail ... 122
Blight of the plum, water-melon, agricultural fairs, Saxony sheep, Lincolnshire sheep, early corn, Berkshire pigs, grain worm, grain maggot ... 138
Mercantile correspondent, a medical one, draining, manual labor schools, millers' tolls ... 154
Madder, peat-swamps, marl, vegetable marrow, pumpkins and squashes, corn in England, ruta baga ... 191
Orchard grass, its value ... 35
Ox-yoke, a new one ... 47
— gearing, remarks on ... 125
— — Portuguese ... 137
Orchard, hints for the ... 54
Old and new husbandry contrasted ... 96
On an agricultural education for gentlemen farmers, and a scientific one for practical farmers ... 105
On the means of increasing the fertility of land ... 145
Philosophy of vegetation ... 159
— of pruning ... 181
Prairies west ... 46
Poultry house, &c ... 47
Process of converting starch into sugar ... 61
Plants exhaust moisture ... 78
Premiums of the Highland society ... 89
Product of the Canterbury Shaker farm ... 113
Premiums for agricultural school books ... 141
Practice vs. theory ... 146
Premium crops ... 181
Pent-bogs, new mode of reclaiming ... 191
Pig-pen, Jewett's rotary ... 20
Pigs, staggers in, how cured ... 40
— process of fattening ... 206
— Berkshire and Leapers, contrasted ... 52
— — described ... 64
— — mode of treatment ... 80
— — high prices of, in Kentucky ... 187
— — weight of S. Craig's ... 183
— Tuscaroras, described ... 78
Potato sugar, how made ... 45
— oats, their great weight ... 206
Potatoes, large tubers give the best produce ... 18
— should not be earthed ... 120
— culture and crop ... 206
— economy in seed ... 190
— Rohan, original notice of ... 35
— — its good properties enumerated ... 149
— — its produce ... 158, 162, 187, 188
— experiments in planting ... 173, 190
— forty-fold, hints for planting ... 91
Pyramids of butter, Meacham's ... 93, 161
Rural embellishment recommended ... 85
Roots how preserved in winter ... 161
— their office and extent ... 134
— their offices ... 176
Ruta baga, its value estimated ... 8
— mode of harvesting ... 10
— its relative value for stock ... 19
— how wintered ... 46
— value of the crop ... 59
— good for hogs ... 77
— mode of culture and product ... 158
— not adapted to the south west ... 190
— J. Hopkins' crop ... 51
— Mr. Mather's crop ... 183
Rotation of crops required in Scotch leases, virtually ... 39
— — in Virginia ... 208
— — in Tennessee ... 93
— — may be carried too far ... 154
— — course proposed ... 155
Remarkable abstinence in a calf ... 109
Reply of D. Stebbins, to remarks on varieties of mulberry, 215
Rules and suggestions in husbandry ... 118
Robinson fund ... 150, 185
Rape, its culture and profit ... 207
Remedy against moth ... 204
Rearing of cattle recommended ... 200
Resources of fertility ... 202
Root culture, preliminary remarks on ... 203
Soil, its offices in vegetable economy ... 130
Soils, new mode of analyzing ... 114
Salt-mines in Poland ... 147
Serious suggestions to farmers ... 169
Silk-worms, hint in regard to ... 191
Statistics of American wool and woollens ... 42
— of Massachusetts manufactures ... 56
Sentiments of Franklin ... 57
Socrates in praise of husbandry ... 66
Stones, how best disposed of ... 76
Stone walls in Ireland ... 204
Steam engines recommended on canals ... 80
Summer fallows, disapproved of ... 94
Scraps from Bulwer ... 100
Sinclair, Sir John, notice of ... 103
Suggestions to the wool-grower ... 119
Salting calves, new mode of ... 207
Self-education, makes the man ... 124
Substitute for spaying ... 140
Spirit of agricultural improvement in England ... 186
System of culture ... 194
Sheep, Daubenton's experiment in feeding ... 20
— the broad-tailed noticed ... 35
— Tunis mountain do ... 39
— Leicester, samples of fine ... 50
— hints on wintering ... 74
— improved cross of ... 152

SCIENCE OF GARDENING.

Arts and science—the word gardening—food of garden plants—garden chemistry ... 65
Water ... 66
Atmospheric air—carbon and carbonic acid gas—nitrogen ... 81
Humic acid ... 82
Potass—lime ... 98
Sugar and gluten—recapitulation and proof from the sap ... 99
Light—heat ... 146
Injurious substances ... 147
Garden physics—direction of plants ... 159
Exposure and shelter—mechanical texture of soils—circulation of water in soils—tests of the texture of soils 160
Rise of the sap ... 173
Rise of leaves—descent of the pulp—seasons of growth and cessation ... 176
Scientific principles of digging and raking—Action of frost on soils—Levelling and draining—Scientific principles of seed sowing—Effects of water and steeping—Time of germinating ... 213
Scientific principles of transplanting—Transporting—Pricking out seedlings—Scientific principles of striking—Chinese mode of striking—Striking by layers—do. by slips or cuttings—Scientific principles of grafting—Binding the graft ... 214, 215
Tables of foreign coins, and value and weight ... 204
— in regard to land measure ... 107
Table for foretelling the weather ... 161
The oak, an emblem of our country ... 202
Things we want ... 6
— a farmer should not do ... 161
Transplanting, hints on ... 18
Tenzies, remarks on their culture ... 72
Theory and practice ... 87
The great danger in the west ... 89
To beautify the country ... 109
The times, comments on ... 110
Turnips, mode of cultivating ... 143
Timber, most durable if cut in summer ... 143
Tropical plant company ... 185
Uncle Sam's account current ... 87
Veterinary art, publication on the ... 11
Vetches, Chan. Livingston's experiments in cultivating. 72
Vitality of seeds ... 89
Wheat, analysis of ... 6
— new varieties noticed ... 77, 183, 18
— properties of ... 202
— to increase the product of ... 109
— mode of culture ... 63
— advantages of hoeing ... 159
— — of brining and liming ... 207
— — of brining and ashing ... 207
— Egyptian, its quality ... 9
— — further notice of ... 49
— spring, late sowing produces most straw, early the
— — best grain ... 81
— — mode of culture ... 124
— farms, should be stock farms ... 94
— Italian, its success in N. Ohio ... 75
— — its failure in S. Ohio ... 190
— — product of ... 18
— — S. Hopkins' crop ... 46
— — A. B. Clark's ... 46
— — preferred to Siberian ... 157
— Siberian, preferred to Italian ... 156
— — its product ... 19
Worn out lands, how renovated ... 208
Wood-land, directions for managing ... 41
We overlook the main point ... 104
We must have knowledge ... 109
Wool, prices of, in England ... 152
What the legislature can do to benefit agriculture ... 185

YOUNG MEN'S DEPARTMENT—*Hints to Young Farmers.*

Indolence ... 67
Remember consequences ... 82
Do not get above your business ... 99
Good and bad luck ... 115
The mind and soil compared ... 132
Social duties ... 195
Electricity, galvanism, magnetism, abuse of memory ... 36
Maxims for farmers ... 82
Importance of improving the mind ... 82

CHEMICAL CATECHISM.

Introductory and miscellaneous ... 67
Atmospheric air ... 33
Caloric ... 99
Water ... 115
Earths, silica and alumina ... 148
Lime ... 163
Alkalies, potash, soda, ammonia ... 179
Acids, the different kinds of ... 215
Industry vs. Indolence ... 132
Poor Richard's almanac ... 162
What is education, answered ... 178
Order and neatness ... 195
Objects and advantages of science ... 217

LIST OF THE CUTS.

No. 1, Scarifier ... Page 7
2, Yorkshire cow ... 8
3, Devonshire ox ... 8
4 to 8, Armstrong's plan of a barn, &c ... 13
9 to 16, Bement's do ... 14
17 to 18, Allen's do ... 15
18 to 20, Hedges ... 34
21 to 25, Clark's poultry house ... 47
26 to 27, Ox gearing ... 47
